

Nuclear Engineering Faculty Development at the Georgia Institute of Technology

The Nuclear and Radiological Engineering (NRE) program in the Woodruff School at Georgia Tech is proposing to create a Nuclear Engineering Faculty Development program. Within the past year the NRE program has hired four new faculty members, three of whom are eligible for this grant. The development program will select two of the three new faculty members to receive a total of \$200,000 per year per faculty in which Georgia Tech will match \$50,000 per year per faculty. The overall intent of the proposed faculty development program is assist in the developing and retention of two highly qualified faculty members in their academic careers.
